## Company Profile

**Your Trusted Bird Management Partner**

## INTRODUCTION

---

At **SUMITRA PRIMER SOLUTIONS**, we are driven by a simple yet powerful vision: to create environments where people can live and work free from the disruptions and health risks caused by birds. We believe in delivering more than just netting — we deliver peace of mind, protection, and long-term value. Our purpose is to set the standard in bird control through innovative, durable, and environmentally responsible solutions. Whether securing a residential balcony or protecting large industrial spaces, we approach every project with a commitment to safety, precision, and integrity. We're not just building barriers — we're building trust, shaping cleaner communities, and redefining what it means to protect space.

# Expert solutions for Bird Control Services

# BIRDS

Our Feature Friend

Pleasing to the eyes

People are bird lovers

People consider them to be a good sign  
when seen around their city

Birds can be considered pests because they can  
cause damage to the environment, infrastructure,  
and human health

**Pigeon**

**Myna**

**Sparrow**

## Type of Bird Pests

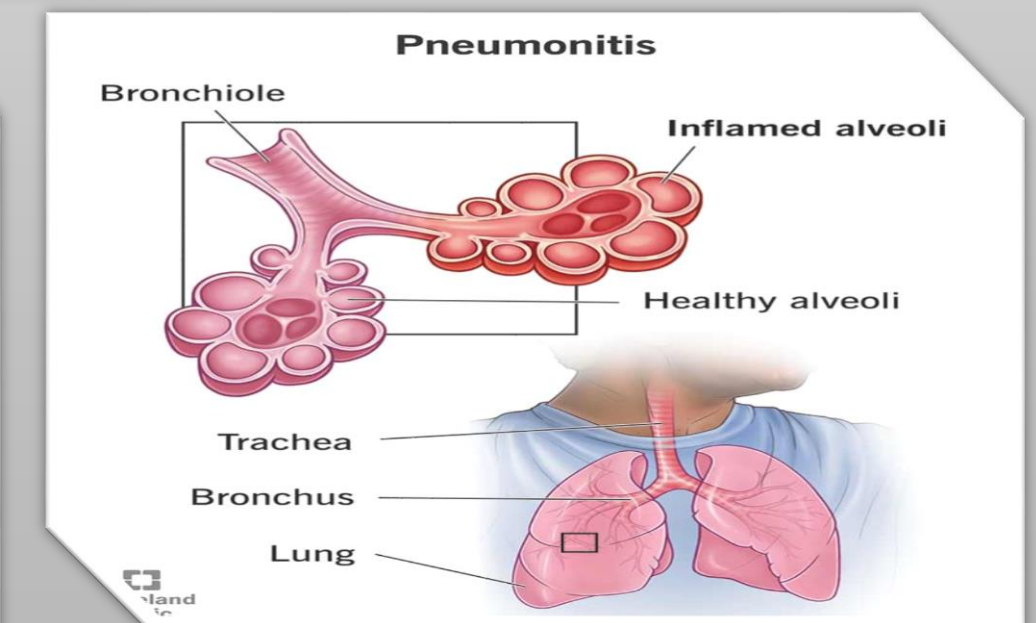

Myna - *Sturnus vulgaris*, Pigeon - *Columba livia*, and Sparrow - *Passer domesticus*

- Feeds on seeds, green feed, domestic scraps in and around cities, near roosting cities.
- Carried a wide range of bacteria such as Salmonella (causes food poisoning) and ornithosis. Dropping from a large roosting flock provides a good medium from pathogenic fungi, some of which can be harmful or even fatal to humans.

# Diseases Transmissible by pigeons

- Histoplasmosis fungus growing in droppings.
- A fatal respiratory disease from a dried pigeon.
- Cryptococcosis caused by yeast found intestinal tract of pigeons and stalling affect the central nervous system.
- Candidiasis yeast on fungus infection spread by pigeons.

- Asthma
- Food contamination instances of people killed by monoxide poisoning through blocked exhaust
- Bird carry insects which are harmful to human beings

## Nuisance

- Fire hazard by nest
- Damage to company image
- Nuisance to human beings

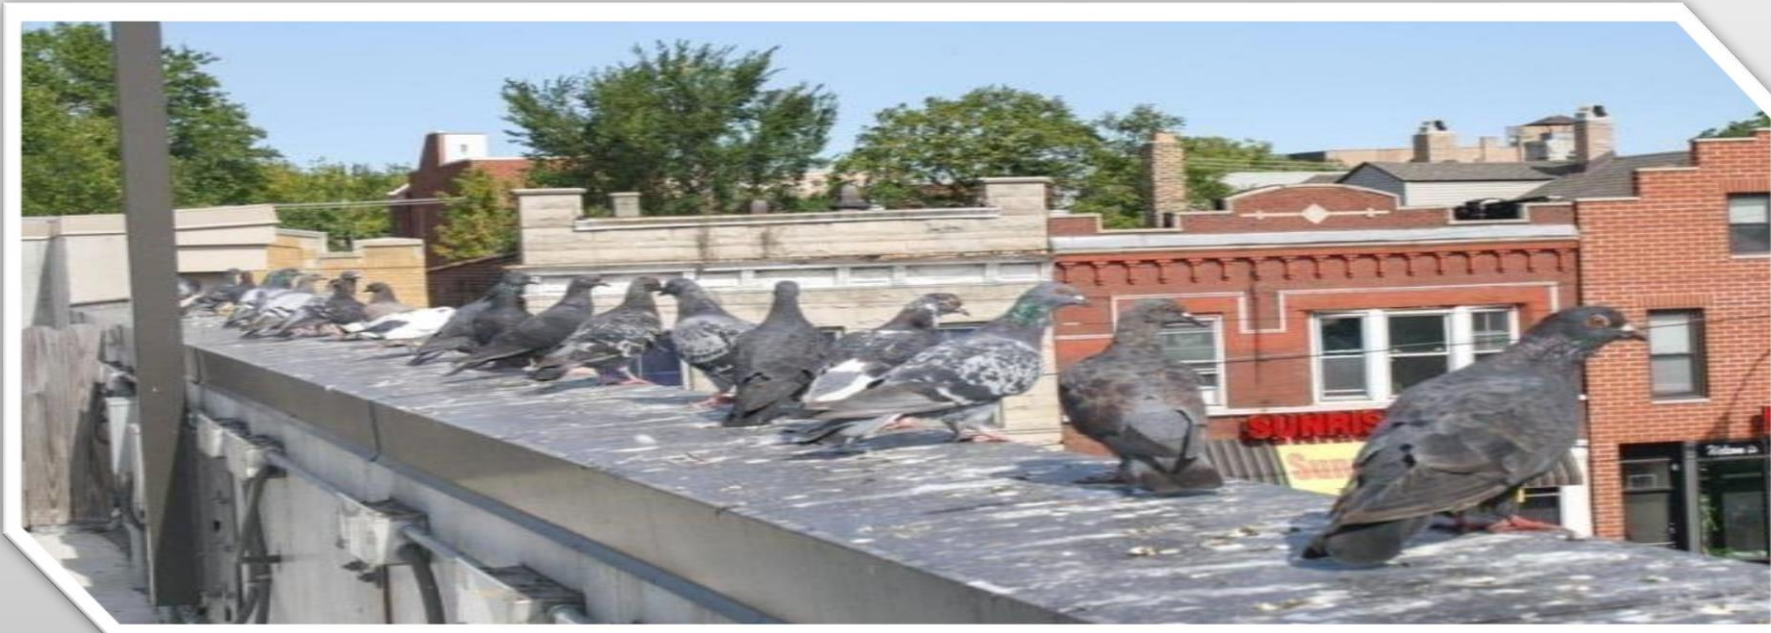

## What is Bird Management?

Bird management is the method to eliminate or deter pest birds from landing, roosting and nesting in any premises.

# Benefits of Bird Management?

- ❑ Net and droppings can block gutters and downpipes, causing water overflow, timber decay, rendering damage, and structural issues.
- ❑ Birds damage stored food, causing monetary losses.

- ❑ Droppings render pavements hazardous especially during rainy conditions. No more slimy droppings and the potential of accidents or litigation.
- ❑ Implementing effective bird management solutions prevents infestation and economic harm.

- ❑ The noise made by birds is annoying and the droppings produce objectionable odor.
- ❑ We can get rid of all these problems with bird management.
- ❑ Elimination of noise and smell.
- ❑ Effective bird management can also help prevent snakes from entering premises, as without birds present, snakes are less likely to be attracted for prey.

# Why to Choose Sumitra?

1

Choose our bird control services for excellence, customer-focused solutions, and a proven record in responsible wildlife management.

2

Unlike temporary fixes, we offers sustainable solutions that provide long-term results. This includes ongoing management and maintenance options to ensure that birds do not return, saving time and money in the long run.

3

Our Sumitra Primer Solutions employees are bird behavior experts, essential for crafting effective, humane bird management strategies that comply with wildlife protection laws.

4

Offers mechanical solution to birds:

- Bird nettings
- Spikes
- Quality Products
- Expert advice on methodology
- Experienced and skilled manpower

5

We are fully compliant with various regulations, including medical insurance, accidental insurance, and workmen compensation policies. Additionally, we carry general liability insurance with third-party coverage to ensure comprehensive protection.

## Pleated sliding doors & window screen

Pleated Mesh systems offer optimal solutions for large doors, windows and balcony subjected to strong wind pressure.

Designed to provide comprehensive protection against including mosquitoes carrying diseases like dengue, this system boast a unique design that effectively keeps flying insects away.

## Invisible grill

This versatile technique might be effectively used for the safety to the children, pets and also found to be effective against monkey.

Invisible grills act as a physical barrier, effectively deterring birds from accessing vulnerable areas such as balconies, windows, and rooftops.
